NOTE.—In many of the subdivisions of counties and parishes of several States no slave population appears, from the fact of the marshals having failed to subdivide the slave population according to the subdivisions as the white and free colored population were returned. The number of slaves must therefore be left to inference, where none are specified in minor divisions, and this applies to nearly all the slave States, and it will be seen that the aggregate of slave population, as returned in the minor subdivisions, falls considerably short of the number returned in the population by counties and parishes.
